SMITH-CORONA®

Coronamatic™ 7000

electric office typewriter

In seconds, you can change ribbon cartridges from fabric to carbon film; from black to a variety of colors; from typing cartridge to correction cartridge.

Oyster White and Golden Brown

Carbon film ribbon produces a print-like quality in executive letters and in materials which must be copied, printed or otherwise duplicated. The correction cartridge removes errors quickly and neatly. Color cartridges effectively emphasize statements, add definition to subheadings or sections and aid in visually organizing the written work. The 7000 has such time saving features as paper injector, repeating keys and electric backspace. It is double insulated which eliminates the need for a three-wire plug. An optional base (CoronaMat) elevates the typewriter and reduces table noise.

UL LISTED MADE IN U.S.A.

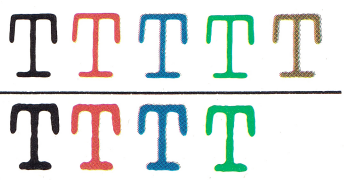
Coronamatic Office Typewriters prove their durability and dependability in all kinds of offices; in business, education, institutions and government. They are built for full-duty, everyday operation without unnecessary bulk and weight. Their design permits rapid access for service when required, and due to the cartridge feature, many parts, levers and linkages are no longer required. Ask your Smith-Corona Office Typewriter dealer for a complete demonstration and instructions. He can also supply you with a full line of Coronamatic Cartridges.

CARBON FILM transfers its ink emulsion to the paper, giving a dense, black impression. It can only be used once, and is then discarded. Carbon film is also for work to be printed, copied or otherwise duplicated.

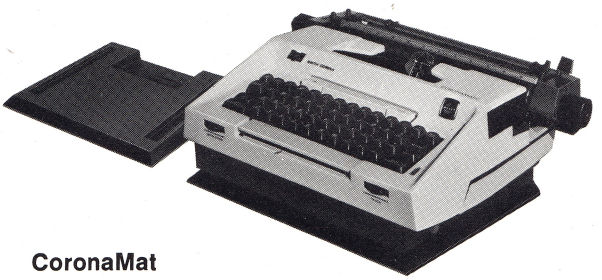
FABRIC RIBBON continuously rewinds into the cartridge, and can be used over and over until it is used up. Fabric ribbon should be used for planning, drafts and routine typing.

CARBON RIBBON

FABRIC RIBBON

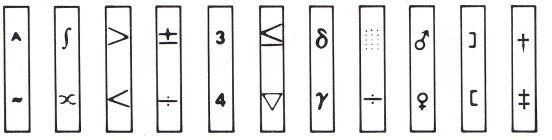


Enlarged 3 times



CoronaMat

A durable base (optional at extra cost) softens the sound of typing, secures the typewriter and reduces desk noise. From your Smith-Corona office typewriter dealer.



Changeable Type

Customize your standard keyboard with a choice of optional signs, symbols and accents. Each has two characters and key cap. Complete library of special characters; engineering, medical, library and accents.
